Onderwerp Besluit op uw Wob-verzoek d.d. 2 augustus 2019

Behandeld door [REDACTED]

Ons kenmerk Z19-5960 / D19-36701

Uw kenmerk -

Bijlagen 17

Geachte [REDACTED],

Op 2 augustus 2019 heeft u een verzoek op grond van de Wet openbaarheid van bestuur (Wob) ingediend, waarin u vraagt om diverse informatie ten aanzien van de pré-export isolatie periode van konikpaarden, die vanuit de Oostvaardersplassen naar Wit-Rusland zijn verplaatst. Bij brief van 6 augustus 2019 is de ontvangst van uw brief bevestigd. Per brief d.d. 29 augustus 2019 heb ik de beslissing op uw Wob-verzoek op grond van het bepaalde in artikel 6 lid 2 van de Wob met vier weken verdaagd, omdat met het verzamelen van de door u gevraagde informatie meer tijd is gemoeid.

Per brief d.d. 16 september 2019 heb ik de beslissing op uw Wob-verzoek op basis van het bepaalde in art 4:8 Algemene wet bestuursrecht (Awb) opgeschort om zienswijzen op de openbaarmaking van de documenten te vragen aan belanghebbende. De belanghebbende heeft een zienswijze op de openbaarmaking ingediend. De zienswijze van de derde belanghebbende heb ik in mijn belangenafweging meegenomen.

1. Uw Wob-verzoek

Het tijdstip van indiening van uw verzoek is bepalend voor de reikwijdte van uw verzoek. Een Wob-verzoek kan nooit betrekking hebben op na dat verzoek vervaardigde documenten.¹ Dit betekent dat documenten vervaardigd na 2 augustus 2019, niet zijn meegenomen bij de behandeling van uw Wob-verzoek.

U vraagt in uw Wob-verzoek om de volgende documenten, in het kader van de bilaterale overeenkomst met Wit-Rusland, over de export van konikpaarden afkomstig van de Oostvaardersplassen naar Wit-Rusland:

1. De verslaglegging inzake de verplichte klinische onderzoeken, inclusief de dagelijkse temperatuurbevestigingen van de betrokken dieren, de uitkomsten van de diagnostische tests uitgevoerd in het kader van de bilaterale overeenkomst (in een officieel erkend laboratorium overeenkomstig EU-goedgekeurde methoden met vermelding van de uitkomst, de datum en de testmethodiek);

¹ ECLI:NL:RVS:2015:623

2. Alle documenten, protocollen en andere gegevens inzake de wijze waarop wordt voldaan aan de eisen inzake de voorkoming van Equine influenza nu deze ziekte zich aërogeen verspreid en het daardoor niet mogelijk is om de quarantaine uit te voeren in combinatie met een weidegang;
3. Melding aan de NVWA van:
 - het verlengen van de isolatie (NB: max 35 dagen isolatie bij verzamelcentrum);
 - het afbreken van een isolatie;
 - het verwijderen van dieren;
 - afwijkende onderzoeksresultaten of laboratorium uitslagen;
 - ziekte, sterfte of andere bijzonderheden;
4. Alle documenten die betrekking hebben op de quarantaine van de konikpaarden in de vangkraal in de Oostvaardersplassen waaronder:
 - protocollen, werkinstructies of enig ander document of fotomateriaal inzake de reiniging- en ontsmettingsvoorzieningen t.b.v. stallen, materialen en voorwerpen;
 - protocollen, werkinstructies of enig ander document of fotomateriaal teneinde te verzekeren dat voer, hooi, stro of strooisel wordt niet betrokken uit of via ruimtes, waar zich andere dieren bevinden;
 - protocollen, werkinstructies of enig ander document of fotomateriaal waaruit blijkt dat vloer en interne afscheidingen/hekwerken van de isolatie inrichtingen qua constructie en gebruikte materialen goed te reinigen en te ontsmetten zijn tot een hoogte van minimaal 2,5 meter;
 - protocollen, werkinstructies of enig ander document of fotomateriaal nabij de ingang is een aparte voorziening met omkleed- en handenwasgelegenheid en een ontsmettingsbak voor schoeisel (bij voorkeur een sluisruimte);
 - protocollen, werkinstructies of enig ander document of fotomateriaal waaruit blijkt dat er voldoende verlichting is;
 - protocollen, werkinstructies of enig ander document of fotomateriaal waaruit blijkt dat de isolatievoorziening zodanig is ingericht, dat, rekening houdend met onder meer ventilatie- en temperatuurbehoeften evenals voeder- en drenkmogelijkheden, de desbetreffende diersoort op adequate wijze kan worden gehuisvest en verzorgd;
 - protocollen, werkinstructies of enig ander document of fotomateriaal waaruit blijkt dat voorwerpen en gereedschappen (kruiwagens, schoppen e.d.) gedurende de isolatieperiode uitsluitend in de isolatievoorziening worden gebruikt en bewaard;
 - protocollen, werkinstructies of enig ander document of fotomateriaal waaruit blijkt dat minimaal voorzien is in een adequate afscheiding d.m.v. dubbel hekwerk met een hoogte van tenminste 1.75 m en 3 meter vrije ruimte tussen de hekken of een sloot van minimaal 3 meter breed.

2. Resultaten onderzoek

Ik heb uitgebreid onderzoek uitgevoerd of Staatsbosbeheer beschikt over de documenten waarop uw informatieverzoek betrekking heeft. Ik heb de betrokken collega's gevraagd naar alle documenten met betrekking tot uw verzoek. Ook heb ik het (digitaal) archief van Staatsbosbeheer doorzocht.

De punten van uw Wob-verzoek komen overeen met de punten van het Werkvoorschrift pré-export isolatie van de Nationale voedsel- en warenautoriteit (NVWA). Dit werkvoorschrift is niet gebaseerd op wettelijk vastgestelde regelgeving, het is een richtlijn voor bedrijven ten aanzien van de isolatie van te exporteren dieren. In overleg met de NVWA is gekozen voor een pre-exportisolatie die voldoet aan de geldende wet- en regelgeving en haalbaar is met het oog op deze unieke situatie en locatie. De NVWA heeft het gehele proces

gecontroleerd en goedgekeurd. Dit wil zeggen dat sommige punten van het Werkvoorschrift pré-export isolatie niet van toepassing zijn op de export van de konikpaarden naar Wit-Rusland. Om deze reden zijn er over deze punten geen documenten aangetroffen.

Ten aanzien van uw eerste punt, heb ik tien laboratoriumuitslagen van de Wageningen University & Research aangetroffen. Op laboratoriumuitslagen nummer negen en tien staat Rusland als exportland genoemd, vanzelfsprekend gaat het hier om Wit-Rusland. De laboratoriumuitslagen negen en tien zijn afkomstig uit het referentielaboratorium in Antwerpen.

Met betrekking tot uw tweede punt, heb ik één document aangetroffen. Het gaat om een instructie van de NVWA ten aanzien van permanente export van paarden, dat te raadplegen is via de website van de NVWA. De Wob is niet van toepassing op reeds openbare documenten. U kunt dit document raadplegen via www.nvwa.nl.

Ten aanzien van uw derde punt, heb ik de aanvraag van de controle isolatie ten behoeve van de export van levende dieren aan de NVWA aangetroffen.

Met betrekking tot uw vierde punt, heb ik een bezoekerslijst, een overzicht van de transpondernummers, een werkprotocol paarden vangweide en een uitslag van watermonsters van de drinkwatervoorzieningen in het pré-export isolatiegebied aangetroffen. Daarnaast heb ik diverse e-mailconversaties inclusief bijbehorende bijlagen aangetroffen. Ook heb ik drie filmopnamen aangetroffen, die onder uw verzoek vallen. Het gaat om filmopnamen van de konikpaarden in de vangweide. Deze filmopnamen zijn reeds openbaar gemaakt en kunt u vinden via:

https://www.youtube.com/watch?v=0L95CdN_gfk

<https://www.youtube.com/watch?v=B1jZjF01njc>

<https://www.youtube.com/watch?v=DmupNkiF3SE>

Daarnaast heb ik een Wob-besluit aangetroffen, waarin informatie staat die ook voor u interessant kan zijn. Bij dit Wob-besluit is een sectieverslag openbaar gemaakt. Ook vindt u in dit besluit meer informatie ten aanzien van het transport van de konikpaarden naar Wit-Rusland en de procedure die hieraan voorafging. U kunt dit Wob-besluit d.d. 24 oktober 2019 raadplegen via www.staatsbosbeheer.nl/woboostvaardersplassen.

Ten slotte kunt u in het informatieve blog van Staatsbosbeheer meer lezen over de konikpaarden, voorafgaand aan het transport naar Wit-Rusland:

<https://www.boswachtersblog.nl/oostvaardersplassen/2019/10/24/terugblik-verhuizing-konikpaarden-naar-wit-rusland/>

3. Overwegingen

3.1 eerbiediging de persoonlijke levenssfeer

De documenten die betrekking hebben op uw verzoek, bevatten persoonsgegevens. Verstrekking van persoonsgegevens blijft op grond van artikel 10, lid 2 aanhef en sub e Wob achterwege wanneer het belang daarvan niet opweegt tegen het belang van de eerbiediging van de persoonlijke levenssfeer. Van openbaarmaking van persoonsgegevens zoals namen, handtekeningen, telefoonnummers en e-mailadressen wordt in lijn met vaste rechtspraak in beginsel afgezien.² Namen van personen die uit hoofde van hun functie in openbaarheid treden, worden wel openbaar gemaakt.

3.2 intern beraad

Op basis van artikel 11 lid 1 Wob blijft openbaarmaking van persoonlijke beleidsopvattingen in een stuk opgesteld voor intern beraad achterwege. Uit de geschiedenis van de Wob blijkt dat hieronder onder andere zijn begrepen nota's van ambtenaren, interne correspondentie, conceptstukken, agenda's en notulen. Onder persoonlijke beleidsopvattingen worden onder andere verstaan meningen, voorstellen, conclusies en aanbevelingen. Deze beperking op de informatieverplichting waarborgt dat ambtenaren een ongehinderde bijdrage kunnen leveren aan het intern beraad.

4. Besluit

De door u gevraagde zaken vallen onder de reikwijdte van de Wob. Ik heb besloten om aan uw verzoek tegemoet te komen en de documenten (deels) openbaar te maken. In de bijlage bij dit besluit treft u 17 documenten, inclusief een overzicht, aan. Voor de overzichtelijkheid heb ik de bijlagen genummerd, de nummers op de bijlagen corresponderen met de nummers op het overzicht van de bijlagen.

Ik heb de in de bijgevoegde stukken vermelde persoonsgegevens en persoonlijke beleidsopvattingen in stukken opgesteld voor intern beraad (deels) onleesbaar gemaakt. Voor de motivering verwijs ik u naar de overwegingen onder 3.1 en 3.2. Per onleesbaar gemaakt onderdeel is zichtbaar op welke grond de informatie niet openbaar wordt gemaakt.

Omdat deze informatie voor meer mensen interessant kan zijn, wordt dit besluit geanonimiseerd op de website van Staatsbosbeheer geplaatst onder www.staatsbosbeheer.nl/woboostvaardersplassen.

5. Rechtsmiddelen

Indien u het met dit besluit niet eens bent, kunt u binnen zes weken na verzending van dit besluit schriftelijk bezwaar maken. Ook een andere belanghebbende kan tegen dit besluit bezwaar maken. Het bezwaarschrift kan worden gezonden aan de Directeur Staatsbosbeheer, Postbus 2, 3800 AA Amersfoort. U wordt verzocht een afschrift van dit besluit bij het bezwaarschrift te voegen.

² ECLI:NL:RVS:2018:321

Een bezwaarschrift moet zijn ondertekend en bevat tenminste :

- Naam en adres van indiener;
- Dagtekening;
- Omschrijving van het besluit waartegen het bezwaar is gericht;
- De gronden waarop het bezwaar rust.

Het niet voldoen aan deze eisen kan leiden tot niet-ontvankelijkheid van het bezwaarschrift.

Een afschrift van dit besluit zend ik aan de belanghebbende.

Als u nog vragen hebt dan kunt u contact opnemen met [REDACTED] via [REDACTED]@staatsbosbeheer.nl.

Met vriendelijke groet,
de directeur, namens deze

[REDACTED]
ir. C. Lever MPA
divisiedirecteur Grond & Gebouwen

 Date of sampling : For date see [Identity]
 Date of acceptance : 20/06/2019

Test results

No.	Identity	Sample type	Test code	Test description	Result
001	528210004994939 , 12/06/2019	Serum	BCB04	Babesia caballi cELISA (Piroplasmosis)	Not detected.
			BUM01 (±)	Burkholderia mallei CFT (Glanders)	Not detected. Serum diluton: 1/5
			EAV01 (±)	Equine Arteritis Virus VNT (screening)	Not detected. Titre: <4
			EIA01 (±)	Equine infectious anaemia virus AGIDT	Not detected.
			CEM05	T. equigenitalis (CEM) PCR	Not detected.
			THE04 (±)	Theileria equi ELISA (Piroplasmosis)	Not detected.

This report may only be reproduced as a whole. The reported results only apply to the received and identified sample shown above. The acceptance policy is applicable to this sample. N.B. Possible deviations on the report have to be mentioned within two weeks after receipt of this report.

UITSLAG:

Lokatie 1

Zeer hard water met licht verhoogd ijzer, verhoogd mangaan , bacteriologisch licht verontreinigd.

Lokatie 2

Zeer hard water met verhoogd ijzer, teveel mangaan , bacteriologisch verontreinigd.

Lokatie 3 drinkbak

Hard water , bacteriologisch licht verontreinigd.

Lokatie 4

Hard water met verhoogd ijzer, verhoogd mangaan, licht verhoogd ijzer , bacteriologisch verontreinigd.

Lokatie 5

Zeer hard water met verhoogd nitriet, licht verhoogd ijzer, teveel mangaan , bacteriologisch verontreinigd.

Lokatie 6

Erg hard water met verhoogd ijzer, licht verhoogd mangaan , bacteriologisch licht verontreinigd.

Lokatie 7

Hard water met verhoogd ijzer, teveel mangaan , bacteriologisch verontreinigd.

Lokatie 8 vang kraal

Zeer hard water met licht verhoogd ijzer , bacteriologisch licht verontreinigd.

CONCLUSIE:

Lokatie 1

Hallo 10.2.e Wob

10.2.e Wob en 10.2.e Wob hebben meer bekeken dan 10.2.e Wob en ik. Wat betreft de quarantaine weide komt het rapport van 10.2.e Wob heel dicht bij dat van ons. De conclusies waren hetzelfde. De enige extra opmerking gaat over een merrie met bijtonden in de achterhand die 10.2.e Wob zou rapporteren en extra in de gaten zou houden. Merrie gedroeg zich normaal, was niet kreupel en in een goede conditie.

Met vriendelijke groet,

Hai 10.2.e Wob

Dank! Uiteraard gebruiken wij geen namen als er iets extern gaat. De provincie zal nog contact met je opnemen m.b.t. het verslag en gebruik ervan t.b.v. een ingelaste statenvergadering voor aanstaande woensdagavond. Deze statenvergadering is woensdag live te volgen via een portaal (<https://flevoland.stateninformatie.nl/live>).

10.2.e Wob: na jullie bezoek gaven jullie ook nog aan een verslag op te stellen van jullie bezoek. Kunnen wij dit verslag ontvangen? Of volstaat het verslag van 10.2.e Wob wat jullie betreft?

Groet,

10.2.e Wob

Met vriendelijke groet,

10.2.e Wob

Onderwerp: Quarantaine controle konikpaarden OVP dd 23-07-2019

Goedemiddag allen,

Afgelopen dinsdagmiddag (23 juli 2019) hebben mijn collega en ik, werkzaam bij de Directie Keuren van de NVWA een bezoek gebracht aan de Oostvaardersplassen voor een controle van de paarden in de quarantaine. We hebben met name gekeken naar het dierenwelzijn in de vangweide in vergelijking met de paarden, die in het open veld staan. Daarnaast hebben we gekeken of de quarantaine nog voldoende borging geeft tot het geplande vertrek van de koniks. Tegelijkertijd waren 2 andere collega's van de Directie Handhaven van de NVWA, ook aanwezig voor een veldbezoek aan de OVP om te beoordelen of aanvullende maatregelen genomen moesten worden om de paarden te beschermen tegen de warmte en de felle zon, die die dag en de komende dagen een belangrijke rol zou gaan spelen. In de bijlage een mail met een link naar de foto's die ik afgelopen dinsdag heb gemaakt. De eerste 6 foto's zijn van de paarden in het open veld, de rest is in de vangweide gemaakt. De laatste 2 foto's laten de lege vangkraal zien; daar staan dus geen paarden.

Paarden in het open veld:

Deze paarden hebben ook toegang tot het bos aan de andere kant van het spoor. Aan die onderdoorgang zouden de paarden gewend zijn, omdat ze in dat bos in de winter ook bijgevoerd worden. Daar hebben de paarden afgelopen winter ook gebruik van gemaakt (informatie SBB en Free Nature). Die doorgang zou dus geen belemmerende factor moeten zijn voor de paarden. Een grote groep koniks staan op het moment van onze controle op de open vlakte nabij water. Er waait een aangename bries. Een screenshot van de weerapp 'Het weer in Nederland' geeft aan, dat het ter plaatse 30,6 graden Celsius is. Ook wij kunnen het bij het water in het open veld goed volhouden; geen last van de warmte. Dat was later op de parkeerplaats buiten bij het beheerkantoor wel anders. In totaal hebben wij ongeveer 2 uur in het gebied doorgebracht. De OVP liggen vlak aan het IJsselmeer, waardoor er eigenlijk altijd wind staat. Deze paarden hebben zich aan de omstandigheden in de OVP aangepast. Met deze weersomstandigheden verblijven zij bij voorkeur op de open vlakte, omdat het daar altijd waait, ze daardoor minder last hebben van (stekende) insecten en ze door de wind beter kunnen afkoelen, dan in een beschaduwde bos (waar ze ook in de luwte staan en er veel meer insecten zijn). Paarden verliezen hun warmte door te zweten. Door het verdampen van zweet verliest het dier ook daadwerkelijk warmte. Zweet verdampt beter wanneer de paarden in de wind staan in de zon, dan wanneer ze in de schaduw in een wind luw bos staan.

De paarden staan aan het water en vertonen normaal natuurlijk gedrag: er wordt ge graasd, paarden drinken van het water, staan in het water en enkele dieren nemen een modderbad. De paarden verkeren in een zeer goede voedingstoestand. De hengsten van de verschillende familiegroepen (harems) zijn nog steeds hun 'gevechten' aan het uitvoeren. De paarden zijn niet nat van het zweet. Enkel enkele hengsten, die altijd drukker gedrag laten zien dan de merries, zien er wat vochtig uit, maar zelfs die zweten niet overmatig. De paarden bewegen rustig en we hebben geen enkel paard gezien, dat tekenen van hittestress laat zien. Jonge veulens liggen wat meer en bij deze warmte gaan ze vaak languit liggen. Ook de jonge veulens drinken nog steeds goed bij de moeder en reageren vlot, wanneer hun familiegroep in beweging komt. Conclusie: deze paarden zijn goed in conditie en laten normaal, natuurlijk gedrag zien; er is geen noodzaak voor het aanbieden van een of andere vorm van beschutting of voor het sproeien van water om verkoeling aan te bieden.

Paarden in de vangweide:

De vangkraal is leeg (zie foto's). Alle paarden staan in hun familiegroep en de familiegroepen zijn verdeeld over een aantal compartimenten. Er zijn in totaal 7 compartimenten met elk hun eigen drinkpoel. Enkele compartimenten zijn samengevoegd. We hebben alle drinkpoelen gezien en elke drinkpoel was toegankelijk voor de paarden. De drinkpoelen kunnen bijgevoerd worden vanuit de sloot, die grenst aan de vangweide. De poelen worden dagelijks gecontroleerd. De paarden worden vanaf het begin van de quarantaine al bijgevoerd met hooi. Dit hooi was vrij arm. Omdat het nog altijd erg droog is en er vrij veel dieren op de vangweide verblijven, blijft de groei van het gras behoorlijk achter. Bijvoeren is dus noodzakelijk. Omdat de dieren nu langer in de vangweide moeten verblijven, krijgen de paarden sinds een week hooi met een betere voedingswaarde bijgevoerd. Bijvoeren van kuil of krachtvoer (brokken) is niet mogelijk, omdat deze paarden daar niet in gewend zijn. Het verstrekken van deze voeding zal leiden tot stoornissen in het maagdarmkanaal. Wij hebben het hooi gezien en het hooi is schoon en ruikt fris en is mooi groen van kleur (de buitenzijde kleurt gauw geel onder invloed van de zon). Wij zijn van mening dat dit hooi de paarden beter kan voeden en we hebben geadviseerd dat dit hooi onbeperkt ter beschikking van de paarden gesteld wordt.

In de vangweide is geen beschutting aanwezig. De harems lopen verspreid in de compartimenten. Door de compartimentering van de vangweide bevordert de toegang tot het drinkwater voor iedere familiegroep; anders kan het gebeuren dat een harem de drinkpoel bezet, zodat deze niet door een andere familiegroep gebruikt kan worden. Ook in de vangweide tonen de paarden normaal natuurlijk gedrag: de paarden grazen, verplaatsen zich rustig door de vangweide en drinken naar behoefte. De paarden verkeren in een normale voedingstoestand; enkele paarden (met name merries met veulen) hebben een matige voedingstoestand (dit is nog niet mager). Alle veulens, die dit jaar geboren zijn, hebben echter een goede voedingstoestand. Ze krijgen dus voldoende voeding via de melk van hun moeder. Wij hopen dat het verstrekken van het voedingsrijkere hooi deze merries beter kan ondersteunen, zodat hun conditie niet verder terugloopt. We hebben geen enkel paard gezien, dat tekenen van hittestress laat zien. Ook de jonge veulens drinken nog steeds goed bij de moeder en reageren vlot, wanneer hun familiegroep in beweging komt. Conclusie: deze paarden zijn voldoende in conditie en laten normaal, natuurlijk gedrag zien; er is geen noodzaak voor het aanbieden van een andere vorm van beschutting of voor het sproeien van water om verkoeling aan te bieden.

Beschutting:

Er is volgens ons geen noodzaak om deze paarden beschutting aan te bieden. De paarden laten normaal, natuurlijk gedrag zien bij temperaturen boven de 30 graden Celsius. Zelfs op een filmpje dat de dierenarts, die in opdracht van SBB werkt, heeft gemaakt op donderdag, zie je rustig grazende koniks, die niet overmatig bezweet zijn. Iedere vorm van beschutting anders dan een boom zal volgens ons argwanend beschouwd worden door de koniks, omdat deze dieren dat niet kennen. Een afdak zal op korte termijn dan ook geen oplossing bieden voor de paarden in de quarantaine. Het uitvoeren van de bouwwerkzaamheden en het bouwwerk zelf leveren alleen maar extra stress op en resulteren in een verkleining van het leefgebied, omdat de paarden de directe omgeving waarschijnlijk zullen mijden.

Drinkwater:

Is in voldoende mate aanwezig en oogt voldoende schoon. Kan aangevuld worden vanuit de aangrenzende sloot.

Voeding:

Sinds een week wordt voedingsrijker hooi aan de paarden verstrekt, dat goed opgenomen wordt door de paarden. De paarden kiezen ook duidelijk voor dit betere hooi. Advies om dit onbeperkt aan de paarden ter beschikking te stellen, zolang ze in de vangweide verblijven.

Quarantaine:

De voorwaarden voor de quarantaine voldoen nog steeds. Vanuit de NWWA is het advies gegeven om zo min mogelijk mensen tot de vangweide toe te laten om de gezondheidsstatus van deze groep te kunnen borgen. De paarden hebben veel testen en behandelingen ondergaan, die vereist zijn om toegelaten te kunnen worden tot Wit-Rusland. De quarantaine is bedoeld om te voorkomen, dat dieren geïnfecteerd kunnen raken. Daarvoor zijn diverse maatregelen genomen. Onnodig bezoek van mensen aan de vangweide kan leiden tot het infecteren van de paarden in de vangweide, wanneer deze mensen recent in aanraking zijn geweest met paarden, die lijden aan een besmettelijke ziekte. Wanneer paarden ziek worden tijdens de quarantaineperiode, kan dit leiden tot het niet exporteren van deze groep paarden. Dan zijn alle kosten en moeite voor niets geweest.

Ik hoop jullie hiermee voldoende geïnformeerd te hebben.

Met vriendelijke groet,

10.2.e Wob

CC: [redacted] 10.2.e Wob
Onderwerp: RE: Stand van zaken testen en chippen in pre-export isolatie gebied Oostvaardersplassen

Beste [redacted] 10.2.e Wob

Dank voor je update. Erg jammer natuurlijk van de drie overleden merries maar het betreft gelukkig geen infectieuze oorzaken. Ik heb gisteren tijdens de tussentijdse controle uitgebreid met [redacted] 10.2.e Wob gesproken en de dieren bekeken. Behandelingen en monsternamen gaan gestaag door, ook tijdens deze warme dagen, klasse! Punt van zorg zijn idd beide jonge veulens waarvan de moederdieren zijn overleden. Het zou mij verbazen als deze veulens het redden maar ik heb met [redacted] 10.2.e Wob overlegd dat we ze een kans moeten geven en omdat ze dagelijks in beeld zijn kan bij achteruitgang direct ingegrepen worden middels euthanasie.

Wat betreft het commentaar van de actievoerders over het feit dat de dieren geen beschutting hebben: jullie ervaring is dat de dieren in het vrije veld tijdens warme dagen liever de open vlakte kiezen dan de bosschages met bijbehorende vliegen en dazen.. Lijkt mij heel plausibel om daarom af te zien van beschuttingsmaatregelen in de isolatie. Bovendien zouden de paarden daar m.i. de eerste tijd aan moeten wennen en er zeker niet onder gaan staan.. Ik heb op jullie kantoor voorgesteld om komende dagen tijdens de hitte foto-/filmopnames te maken van de paarden in het vrije veld zodat je dit, indien nodig, als onderbouwing van jullie besluit kunt opvoeren. Drinkwatervoorziening is uiteraard een belangrijk aandachtspunt tijdens deze warme dagen maar dat is prima voor elkaar, zeker als edd de extra bakken aan de kant van de spoorlijn geplaatst zijn.

Ik zou idd voor de zekerheid van de dode merries gewoon bloedonderzoek en paspoortaanvragen laten meelopen in de procedure. Waarschijnlijk zijn de uitslagen al bekend (ik kreeg een tweetal uitslagen van [redacted] 10.2.e Wob doorgestuurd).

Mochten er andere vragen of onduidelijkheden zijn hoor ik ze graag, zo niet dan zien we elkaar op de dag van export (11 juli is gepland heb ik begrepen).

PS: [redacted] 10.2.e Wob zou je op de bezoekerslijst bij de isolatie mijn bezoek van gisteren willen noteren (naam, functie, reden van bezoek: tussentijdse pre-export isolatiecontrole)?

Met vriendelijke groet,

Onderwerp: Stand van zaken testen en chippen in pre-export isolatie gebied Oostvaardersplassen

Beste 10.2.e Wob en 10.2.e Wob

Hierbij ontvangen jullie de stand van zaken van het testen en chippen in het pre-export isolatie gebied in de Oostvaardersplassen. Er zijn een aantal zaken waar we jullie graag van op de hoogte brengen:

- Op vrijdag 14 juni troffen we in vak 1 een merrie aan met een oedeem onder de buik en opgetrokken flank. De merrie was wat traag, maar liep goed mee met de groep en graasde. Overlegd met 10.2.e Wob en besloten het aan te kijken.
- Op zaterdag 15 juni lag er een merrie dood in de drinkpoel in vak 7. Dit dier was nog niet gechipt en behandeld. Ik heb alle dieren eerder in beeld gebracht en kon dus ook achterhalen om wel dier het ging. Bij het dier wat ik mis stond 'drachtig?'. Het dier lag in de poel, maar lag niet vast. Ik vermoed dat het niet goed is gegaan met de bevalling en het dier verkoeling heeft gezocht. Het dier is afgevoerd door rendac. Er waren uiterlijk geen bijzonderheden waar te nemen aan de merrie.
- Op maandag 17 juni hebben we een merrie met de oedeem behandeld. Ze was nog een tikje trager dan vrijdag en had inmiddels ook een wond op het neusbeen. Vermoedelijk is ze in een gevecht terecht gekomen, waardoor ze zo heftig verwond is geraakt. We hebben haar opgesloten, gechipt, alle vereiste behandelingen gedaan en aanvullend biodyl en meloxidolor gegeven. Ook een equest pramox gegeven ipv gewone equest. Hart geluisterd, geen bijzonderheden. Chipnummer is 528210006046762. Verder in de gaten houden. Dinsdag, woensdag en donderdagochtend is het dier nog gezien. Het oedeem leek minder, maar gedrag bleef trager. Wel werd ze er steeds door de hengst bijgehaald en dan draafde ze ook wel. Ze bleef haar veulen ook zogen. Vrijdag troffen we de merrie helaas dood aan in de drinkpoel. Ze ligt klaar voor rendac.
- Op vrijdag 21 juni is een merrie dood gegaan kort na behandeling. Het dier was met een achterbeen door de spijlen gegaan en had een adertje geraakt. Dat bleef bloeden. We hebben haar helemaal moeten sederen, om het been te kunnen hechten. Na sedatie duurde het logischerwijs even voor het dier bijkwam, maar ze werd wel goed wakker. Tot ze na een uurtje of wat toch ineens dood lag. De slijmvliezen waren erg blauw. We vermoeden op basis daarvan een darmdraaiing. Ook deze merrie ligt klaar voor rendac. Chipnummer is 528210006043607.
- De meeste dieren die we behandelen, zijn mooi in conditie. Een enkel dier valt wat tegen (conditiescore 2). Die behandelen we met equest pramox ipv gewone equest en zo nodig geven we biodyl, om het dier net even iets extra's mee te geven. Ook treedt er een enkele keer een beschadiging op doordat de dieren gestrest raken en gaan vechten. Wonden zijn meestal oppervlakkig. Als het kan, behandelen we ze met wondspray, maar vaak geeft dat opnieuw een stressreactie en is het middel erger dan de kwaal.
- Er zijn nu inmiddels 97 dieren gechipt en behandeld. Waarvan dus helaas 2 dieren het niet gered hebben. De teller staat nu op 95.
- Een punt van zorg is de twee veulentjes van de dode merries. Beide veulens zijn hooguit 2 maanden oud. Ik heb vorig jaar een moeder laten inslapen van een veulen van 4 maanden. In eerste instantie is dat vaak geen probleem. De problemen ontstaan pas aan het einde van de winter. Dit veulen heeft het niet gered (in maart geëuthanaseerd), ondanks bijvoeren. Het kantelpunt waarop veulens het bij ons (/in de natuur) vaak wel redden, is rond de 6 maanden. Deze veulens zijn veel jonger. Het is dus de vraag hoe we hiermee om willen gaan. Voor nu lopen de veulens allebei rustig bij hun eigen

groep. De zorgen zijn dus vooral voor de toekomst, er is nu geen sprake van een acute situatie of leed. Het ene veulen is al gechipt en het andere is goed in beeld obv geslacht en kruinen. We kunnen dus met zekerheid zeggen om welke veulens het gaat.

- Een andere vraag is of van de dode dieren ook bloed onderzocht moet worden en of er paspoorten van die dieren aangevraagd moeten worden. Wat ons betreft loopt dit gewoon mee in de procedure zoals we die anders ook zouden doen. Dus ook gewoon testen en paspoort aanvragen. Hoe staat jullie hierin?
- Er is veel onrust onder de actievoerders over de verwachte hitte in de komende dagen. De dieren hebben allemaal beschikking over drinkpoelen en vanaf maandag 24/6 worden er aanvullend nog waterbakken geplaatst, zodat elk dier voldoende water tot zich kan nemen. Beschutting is er niet of weinig. De dieren kennen dat ook niet vanuit de Oostvaardersplassen. Daar verkiezen ze de verkoeling van de wind boven de schaduw in de randgebieden. We houden ze in de gaten. Het chippen en bloedtappen gaat de komende dagen gewoon door is de planning, tenzij we merken dat het voor dier (of mens) niet verantwoord is. De ervaring van de eerdere dagen leert juist dat ze rustiger zijn bij deze temperaturen. Dat is niet alleen fijner voor ons, maar ook zeker voor hen.
- Ik heb over de onrust bij de actievoerders mbt de hitte ook contact gehad met **10.2.e Wob** van de NVWA, ivm mogelijke handhavingsverzoeken.
- De actievoerders dreigen met het loslaten van de dieren. Daarom zijn er extra camera's geplaatst en is er beveiliging ingeschakeld voor de nachten.
- De compartimentering in de vangweide verloopt naar wens. De paarden hebben respect voor de draad en de groepen blijven gescheiden. Een enkele keer komt een dier tussen de tussenrasters. Vorige week was dat een uitgestoten hengstje. Die heb ik naar het vak met de hengstengroep gebracht. Dan kan hij zich daar aansluiten. Ook heb ik twee vakken samen gezet, omdat hier een harem uit elkaar gevallen was. De hengst werd steeds over de draad gejaagd, omdat hij zich nergens aan kon sluiten. Hij loopt nu ook in het vak met de hengstengroep en nu is er rust.
- Donderdag 20 en vrijdag 21 heb ik alle paarden geteld, groepen nagekeken en gecontroleerd op snotneuzen of andere opvallendheden. Alles gezond en in orde. Ook de drinkpoelen nagelopen. De poel in vak 6 valt langzaam droog, maar deze dieren lopen in meerdere compartimenten (5,6 en 7) en hebben elders dus drinkwater tot hun beschikking. Poel 6 wordt in de komende week weer uitgegraven.
- We hopen eind deze week de 180 beoogde paarden gechipt en behandeld te hebben.

In de bijlage de lijst transpondernummers t/m vrijdag 21-6.

Als bovenstaande tot vragen of aandachtspunten voor ons leidt, dan horen we dat graag.

Met vriendelijke groet,

10.2.e Wob

Teamleider Afdeling Projecten (regio Noordwest Nederland)
Projectmanager Oostvaardersplassen

Staatsbosbeheer

Bezoekadres: Naritaweg 221 | 1043 CB Amsterdam-Sloterdijk
