Uw kenmerk -

Bijlagen Zie bijlageoverzicht

Geachte

Op 22 januari 2020 heeft u een verzoek op grond van de Wet openbaarheid van bestuur (Wob) ingediend, waarin u vraagt om de openbaarmaking van verschillende documenten die betrekking hebben op communicatie tussen Staatsbosbeheer en Paleolitico Vivo en communicatie tussen Staatsbosbeheer en Stichting paard in nood Spanje. Bij brief van 28 januari 2020 is de ontvangst van uw brief bevestigd.

Per brief d.d. 18 februari 2020 is de beslissing op uw Wob-verzoek op grond van het bepaalde in artikel 6 lid 2 van de Wob met vier weken verdaagd, omdat met het verzamelen van de door u gevraagde informatie meer tijd is gemoeid.

Uw Wob-verzoek

Het tijdstip van indiening van uw verzoek is bepalend voor de reikwijdte van uw verzoek. Een Wob-verzoek kan nooit betrekking hebben op na dat verzoek vervaardigde documenten.¹ Dit betekent dat documenten vervaardigd na 22 januari 2020, niet zijn meegenomen bij de behandeling van uw Wob-verzoek.

U vraagt in uw Wob-verzoek ten aanzien van de documenten betreffende Paleolitico Vivo om het vernieuwde contract tussen Staatsbosbeheer en Paleolitico Vivo, alle vormen van communicatie tussen Staatsbosbeheer en Paleolitico Vivo vanaf augustus 2019, facturen en onkostenoverzichten van het werkbezoek in januari 2020 naar Paleolitico Vivo, de tijdens dit bezoek gemaakte foto's, video's en verslagen en overlegstukken met de dierenarts Staatsbosbeheer.

Ten aanzien van de documenten betreffende stichting paard in nood Spanje vraagt u wederom om alle communicatie tussen de stichting en Staatsbosbeheer vanaf augustus 2019, alsmede om verslagen, documentatie, overlegstukken en afspraken over zieke paarden en gecastreerde hengsten.

¹ ECLI:NL:RVS:2015:623

Resultaten onderzoek

Ik heb uitgebreid onderzoek uitgevoerd of Staatsbosbeheer beschikt over de documenten waarop uw informatieverzoek betrekking heeft. Ik heb hiervoor het (digitaal) archief, de systemen en de betrokken collega's geraadpleegd.

Ik heb 61 documenten aangetroffen.

Zienswijze

Voor de documenten 44 tot en met 58 is zienswijze op de openbaarmaking van de documenten gevraagd aan belanghebbende. De belanghebbende heeft een zienswijze op de openbaarmaking ingediend. De zienswijze van de derde belanghebbende heb ik in mijn belangenafweging meegenomen.

Overwegingen bij openbaarmaking

De informatie waarom u heeft verzocht wordt door Staatsbosbeheer openbaar gemaakt met uitzondering van de informatie waarop de uitzonderingsgronden en beperkingen van de Wob van toepassing zijn. Per document is beoordeeld in hoeverre de informatie openbaar kan worden gemaakt. Voor zover zinnen en passages onleesbaar zijn gemaakt is steeds aangegeven op welke grond dit is gedaan. Een toelichting daarop volgt hierna:

Tot personen herleidbare gegevens, art. 10 lid 2 sub e Wob

De documenten die betrekking hebben op uw verzoek, bevatten persoonsgegevens. Verstrekking van persoonsgegevens blijft op grond van artikel 10, lid 2 aanhef en sub e Wob achterwege wanneer het belang daarvan niet opweegt tegen het belang van de eerbiediging van de persoonlijke levenssfeer. In de documenten staan o.a. namen, (e-mail)adressen en telefoonnummers. Van openbaarmaking van persoonsgegevens zoals namen, handtekeningen, telefoonnummers en e-mailadressen wordt in lijn met vaste rechtspraak in beginsel afgezien.² Namen van personen die uit hoofde van hun functie in openbaarheid treden, worden wel openbaar gemaakt. De documenten met nummers 40 t/m 42 bevatten, naast persoonsgegevens, ook inzicht in de menukeuze. Ik vind dat het belang van openbaarmaking van deze gegevens niet opweegt tegen de inbreuk op de persoonlijke levenssfeer van de medewerkers. Deze gegevens zijn daarom ook op grond van artikel 10 lid 2 aanhef en sub e Wob onleesbaar gemaakt.

Besluit

De door u gevraagde zaken vallen onder de reikwijdte van de Wob. Ik heb besloten tegemoet te komen aan uw verzoek en de documenten (deels) openbaar te maken. In de bijlage bij dit besluit treft u 58 documenten, inclusief een overzicht, aan. Voor de overzichtelijkheid heb ik de bijlagen genummerd, de nummers op de bijlagen corresponderen met de nummers op het overzicht van de bijlagen. De documenten met nummers 59 t/m 61 zijn filmopnamen. U kunt deze raadplegen via:

- <https://bit.ly/konspa1>
- <https://bit.ly/konspa2>
- <https://bit.ly/konspa3>

² ECLI:NL:RVS:2018:321

Ik heb de in de bijgevoegde stukken vermelde gegevens (deels) onleesbaar gemaakt. Voor de motivering verwijs ik u naar de overwegingen. Per onleesbaar gemaakt onderdeel is zichtbaar op welke grond de informatie niet openbaar wordt gemaakt. Informatie die niet onder de reikwijdte van uw verzoek valt, maar wel in de documenten is opgenomen, maak ik niet openbaar.³ Deze passages zijn onleesbaar gemaakt.

Rechtsmiddelen

Indien u het met dit besluit niet eens bent, kunt u binnen zes weken na verzending van dit besluit schriftelijk bezwaar maken. Ook een andere belanghebbende kan tegen dit besluit bezwaar maken. Het bezwaarschrift kan worden gezonden aan de Directeur Staatsbosbeheer, Postbus 2, 3800 AA Amersfoort. U wordt verzocht een afschrift van dit besluit bij het bezwaarschrift te voegen.

Een bezwaarschrift moet zijn ondertekend en bevat tenminste :

- Naam en adres van indiener;
- Dagtekening;
- Omschrijving van het besluit waartegen het bezwaar is gericht;
- De gronden waarop het bezwaar rust.

Het niet voldoen aan deze eisen kan leiden tot niet-ontvankelijkheid van het bezwaarschrift.

Een afschrift van dit besluit zend ik aan belanghebbenden. Omdat deze informatie voor meer mensen interessant kan zijn, wordt dit besluit geanonimiseerd op de website van Staatsbosbeheer geplaatst onder www.staatsbosbeheer.nl/woboostvaardersplassen.

Als u nog vragen hebt dan kunt u contact opnemen  via  [@staatsbosbeheer.nl](mailto:staatsbosbeheer.nl).

Met vriendelijke groet,
de directeur, namens deze,

drs. B.A. Revis
divisiedirecteur

Good morning 10 lid 2 e

I received the emails you have sent to my colleagues last week.

You have already had contact with 10 lid 2 e from Free Nature about the current situation and he updated me. I am sorry to hear that not all the horses that came from the Oostvaardersplassen are in good health. When they left here they were in good health and condition, so I hope that you can determine what is the matter soon and have the horses treated.

Although the horses are now your responsibility, Staatsbosbeheer is willing to support you with this situation. Let's have contact about this, like you suggest, when you are back from holidays, or sooner if it is urgent.

Please keep us posted on the outcome of the veterinarian research.

Kind Regards,

 Onderwerp: Our visit to Paleolítico Vivo

Dear 10 lid 2 e

As already discussed, we will visit you in January. We will arrive on January 16th around 8 o'clock in the evening and will leave the 18th in the morning. Staatsbosbeheer will be represented by 10 lid 2 e, area manager of the Oostvaardersplassen and myself, former projectmanager Oostvaardersplassen and currently manager project- and relation management. Main goal of our visit is to come to a mutually agreed continuation of our collaboration. In order to achieve this, I think that we have to review the contract and see if adjustments are needed and if so, how to formulate these. The most important issue for Staatsbosbeheer is that the horses coming from the Oostvaardersplassen can live a semi-wild life in natural conditions, in social herds in nature areas. We would like to discuss with you what you need to achieve this and the options Staatsbosbeheer has to assist you in this regard.

We would also like to visit Paleolítico Vivo with you and use this opportunity to talk to you and your team and to get to know you better. Of course we would like to tell you more about the Oostvaardersplassen area during our visit, but our cooperation is more important! In order to achieve that and to be able to focus on getting to know each better, it is important that we only talk with you and other organisations do not participate in our meetings, to prevent that the conversation would be about the Oostvaardersplassen. I hope you understand.

Can you let us know who we will meet during our visit? And can you, as you suggested, make a reservation for us for two nights at Al Pie del Arbol? And is it okay for you to communicate in English during our visit?

We look forward to meeting you! With best regards,

Dear 10 lid 2 e

Thank you for the letter you sent us on November 8th. We regret that we have ended up in a situation where the collaboration is not as good as we would like it to be. As you stated in your letter it is important that we treat each other as equal partners and I totally agree. Reading your letter I have come to the conclusion that you don't feel we have treated you as equals and I feel sorry for that. To change this in a positive way we would like to visit you to talk about the project and the mutual collaboration. And we would like to come to an agreement on how to proceed.

Therefore I would like to visit you in the first half of December or early January, accompanied by a colleague. I hope you are willing to receive us. Please let us know.

With best regards,

Onderwerp: Re: Situation with the konik horses

Hello 10 lid 2 e

My veterinarian thinks that with an ivermectine treatment the horses will be ok very quickly. So I think the parasite problem will be finished soon. That don't worry me.

What I want you to consider is the possibility of moving only 10 animals to 10 lid 2 e. We have 45 animals since the foals birthing. Many of the females were pregnant. The number increases in a 50%. As you remember we asked you for bison female or highland cows males to bring with the horses in march but finally none of them were brought. For us could be a compensation for the effort of receiving those animals we didn't need. Maybe I made a big mistake accepting them but now I can't go back.

I understand that you don't want the animals at 10 lid 2 e because is not a real rewilding place but I think the place is ok and the animals will be in better condition than with me. If she takes in the horses in her foundation the eyes of everyone will move there releasing us from the centre of attention. Please do an exception for me with that.

I beg you think in my project. Our resources are limited and maybe this year we can keep the animals in good condition with the support of the people but what will happen in 2020 or 2021. We would like to have a population of no more than 50 konik in the future so we will sterilize them every year until we reach the objective. Is for the welfare of them that is the most important thing.

All the best.

Asunto: Situation with the konik horses

Dear 10 lid 2 e

This week I had contact with 10 lid 2 e a few times about the situation with the konik horses at your place. I totally understand that you are not happy with the situation and the bad press you are receiving from Dutch action groups.

We discussed the laboratory results you sent with our veterinarians and they don't see an alarming amount of worm eggs. They say that the test results can't explain the reduced vitality of the horses. What I propose is that your veterinarian will get in contact with our veterinarian 10 lid 2 e (10 lid 2 e@flevovet.nl, 10 lid 2 e) to discuss the possible veterinary causes of the reduced vitality and that based on their conclusions you can take further action. We are willing to discuss further actions with you and see what we can do to help you. From our point of view moving the horses to another area where they can't live a (semi) wild life in natural conditions and in social herds is not a solution.

Can you agree with my proposal to first get more clarity on the possible causes by letting the veterinarians first discuss this?

Best regards,

Dear 10 lid 2 e

In the Whatsapp audio-message you sent me yesterday you are asking me for a reaction on the proposal to replace a part of the herd to 10 lid 2 e (Stichting Paard in Nood Spanje). First of all it is important for you to know that 10 lid 2 e is not acting on behalf of Staatsbosbeheer. As long as the cause of the reduced vitality of the horses isn't explained I'm not convinced a replacement of horses as proposed by 10 lid 2 e is in the best interest of the horses. I am however very much willing to discuss further steps with you. Before doing so I advise strongly that your veterinarian will get in contact with our veterinarian (as stated below). That should help clarify the issue that needs to be solved. On the basis of their findings we can discuss further steps.

Best regards,

Addition to the contract 'transfer rewilded Konik horses' as signed 8th March 2019 between Living Paleolithic Reserve and Staatsbosbeheer

1. All horses (including foals) temporarily transferred to 'Foundation Horses in Danger' will be transferred back to the owner 'Living Paleolithic Reserve'.
 - o LPR is responsible and will organise the transport.
 - o Staatsbosbeheer is willing to pay the transport of these horses.
2. The foals are in ownership of LPR and it is the responsibility of LPR to decide what to do with the foals.
3. The horses originated from the Oostvaardersplassen should live in natural or semi-natural conditions and it is in the expert judgement of LPR to decide if areas are suitable.
4. Ownership can be transferred to other parties as long as point 3 is agreed upon in a contract.
5. It is the responsibility of LPR to maintain a balanced and healthy population. This means that foals or adult horses can be taken out to reduce the population.
6. Staatsbosbeheer will once provide one truck of hay to LPR for the winter/spring of 2020.
7. The hay available in the Netherlands is of higher quality than available now in Spain. This is the reason we will transport hay from the Netherlands.
8. To reduce costs LPR will put effort in finding a transportation company to bring the hay from The Netherlands to the LPR.
9. Staatsbosbeheer and LPR will communicate instantly and directly to each other about anything concerning our cooperation.

This addition is agreed upon by:

10 lid 2 e, Director of Living Paleolithic Reserve.

10 lid 2 e, teamleader Living Paleolithic Reserve.

17th of January 2020, Burgos, Spain

In Atapuerca 13th September 2019

In a special meeting held today and with the analysis of the events in recent weeks, the management of the Paleolithic Quaternary Reserve has taken the decision to temporarily transfer some of its animals to the Caballos en Peligro Foundation next September the 15th in Almadén de la Plata, Seville. This foundation has the function of caring for and treating sick or injured horses. The transfer comes after an agreement signed between Paleolithic Vivo (hereinafter PV) and the Foundation Horses in Danger (hereinafter FCP) by which the FCP offers to pay for the transport, treatment and surgeries of 2 horses and 7 mares with their foals and all the veterinary services that PV might need in the future. Various interventions such as a vagina suture, tumor surgery, operation and recovery of leg fracture, treatments for parasitosis, liver infection, eye operation, etc. are urgent. Adult specimens will be returned to the PV reserve once the treatments and recovery have concluded.

We want to say clearly that the horses arrived in Spain from the Staatsbosbeheer last march came in good condition (except for some high rates in liver indicators) to our reserve and it is our responsibility, as it is have affirmed from SBB in media, that the animals recover to 100%. That is why we have made this decision, also for solidarity and avoid economic expenses.

It is our intention not to publish this agreement between PV and FCP prefer to keep it within the maximum discretion. No official publication will be made in any meda unless Staatsbosbeheer makes any unilaterally and our opinion is required. Nor are we responsible for leaks or opinions of people outside our project. This action has been very much considered after having suffered an unprecedented harassment campaign against PV by some sectors of the Dutch press and certain pseudo-environmentalists.

We wish from the heart that this temporary action that we have adopted is not misunderstood nor used to spoil the extraordinary relationship we have had so far, nor that it be used to fuel the fury of collective philosophies opposed to ours. We understand that the main concern of all the legal agents involved is the welfare and survival of the horses.

We also inform that the castration of males in our reserve will not proceed as was the wish of Staatsbosbeheer.

We remain at your disposal for any clarification on this subject.

Receive a warm greeting

Dear mister 10 lid 2 e

I would like to start by thanking you for sending Staatsbosbeheer the semi-annual report regarding the horses, as agreed upon in our contract. I did notice however, that the report concerns only a limited number of the horses Staatsbosbeheer transferred to you. For example the horses you have seen fit to transfer to the Foundation of Horses in Danger (Caballos en Peligro Foundation (FCP)) in Alamdén de la Plata, Sevilla. Your decision to do so was an unpleasant surprise, given the fact that our projectcoordinator informed you on September 3, 2019, that Staatsbosbeheer was not convinced of the necessity of a transfer in light of the available information. It is precisely for that reason that Staatsbosbeheer suggested further contact between our veterinarian and yours, to discuss the situation. Unfortunately, you did not respond to this suggestion. And when you did respond on September 6 and 10, you failed to mention the fact that the horses had already been transported. Both veterinarians did however meet at a conference and had the opportunity to discuss and agree which treatment would be most suitable regarding the problems at hand. Subsequently, Staatsbosbeheer's veterinarian has repeatedly tried to contact you in order to discuss this joint advice with you, but again you did not respond. Neither did you respond to various attempts by our projectcoordinator to contact you by phone. Last but not least, the information you provided in the semi-annual report regarding the transfer of the horses differs substantially from the public reports of FCP. While you state that the horses are to be transferred on September 15, 2019, FCP has stated that the transfer has already taken place on September 7! I believe that this is not the manner in which parties - which have an extraordinary relationship as you have stated - conduct their business. Staatsbosbeheer does not understand this and is disappointed about the lack of adequate information and your failure to respond timely to our requests for information, contact and offer for help.

FCP has communicated that the horses which have been transferred to Alamdén de la Plata, Sevilla, have been treated intensively. Apparently, two stallions have been castrated, notwithstanding the fact the Staatsbosbeheer informed you on September 3, 2019, that this intervention is neither warranted nor in accordance with the agreement between parties, which stipulates that the horses will spend the rest of their natural lives as part of the herd they arrived in and lead a semi-wild life in natural conditions and that preventive veterinarian care will not be applied. The same applies to the other (veterinarian) interventions,

such as taking the herd apart and the separation of family groups. Staatsbosbeheer is interested in learning what the medical necessity for these interventions has been, as well as for the transfer of the horses. The discussion between your veterinarian and ours does not provide any additional information as to why these horses could not be treated at Paleolithic. If a transfer was indeed inevitable, serious questions arise as to the care provided to the horses during their stay at Paleolithic. In addition, Staatsbosbeheer would also like to know what you have agreed upon with FCP and receive a copy of your contract with FCP.

Staatsbosbeheer trusts the transfer of the horses to be a temporary measure only and that at the time of the annual report all horses, including the foals, will have returned to Paleolithic. Staatsbosbeheer is of the opinion that the contract applies to both the horses transported to and received by you, as well as their direct offspring. If all horses have not returned to Paleolithic at the time of the annual report, other options will be considered.

For now, Staatsbosbeheer would like to receive a complete semi-annual report containing information regarding the medical status and current state of welfare of all horses, both those who were transported to you, as well as their offspring. In the report, I would like you to address the issue of the high rates of liver values of the horses at arrival at Paleolithic, in particular the moment of testing, the test results and the horses concerned.

I would like to emphasise that Staatsbosbeheer understands the impact of the harassment you have experienced as you have stated earlier and the pressure you and your organisation have been under, especially with regard to the treatment issue at hand. This however, should not have affected or affect our communications and the exchange of information. On the contrary, it should have intensified our communication. I would therefore propose that in case of further pressure of third parties regarding the horses, Paleolithic and Staatsbosbeheer strive for a common approach, based upon a swift exchange of information. Communication is the key to avoid misunderstanding.

I have taken notice of your remark that no official publication will be made by you in the media. Staatsbosbeheer however cannot commit to doing so. Being a governmental organisation, Staatsbosbeheer is subject to the Netherlands Freedom of Information Act and as such in principle obligated to provide information, if and when requested. Apparently you have not made similar arrangements in your contract with FCP, as FCP has already extensively sought publicity regarding the transfer of the horses, requiring Staatsbosbeheer to respond to questions from journalists.

I trust it is clear to you that Staatsbosbeheer intends to continue our cooperation with you regarding the horses. Such a cooperation requires however, a timely and frequent exchange of all relevant information, as well as direct contact, especially when parties become a topic of interest of the media. Staatsbosbeheer looks forward to this and trusts Living Paleolithic Association does the same.

Looking forward to your reaction,
on behalf of the director,
yours sincerely,

10 lid 2 e

Burgos 8th November 2019

Dear colleagues,

Firstly I would like to apologize for the delay in responding to your communication. It has taken me several weeks to answer due to the tiredness and annoyance that this situation is leading to the limit of our patience for having become the focus of the Dutch press and social networks of a very humble project such Living Paleolithic is.

From the very beginning of our professional relationship I have tried to be very cordial and understanding with you but I begin to see aspects that I do not like and that put my credibility in doubt and my intentions out of place.

I would like to start by emphasizing that communication between our entities has always been very fluently and immediate except in very exceptional cases due to work obligations. It is not true that they have tried to contact me and have not responded. I have all emails, phone calls and all whatsapp to show you that always with more or less time has been answered. The problem perhaps is that you are many interlocutors and I am one and the information may not arrive properly. But I insist I have always responded. I don't hide myself or hide anything.

The situation of the Konik was bad in here. Problems of adaptation to the diet, mild parasitosis and strong competition of the herds to access the food. The image of the animals was not good for me and required immediate help. In these cases and more with the yellow press already smelling carrion should act in 24 hours, not in several days or weeks. From SBB you only offered me veterinary advice, something that I was very clear every time that was not necessary. We knew very well the type of parasite and the problem we had. Our veterinarians are very competent, Spain has great universities and professionals in the sector.

It was then that [REDACTED] 10 lid 2 e and [REDACTED] 10 lid 2 e decided to implement an immediate plan, something you should have done seeing how the events were unfolding and seeing that the weight of the problem was increasing. If I were you I would have sent the following message : "Do not move the animals. In 72 hours, a hay truck will arrive in Spain and medicines necessary to solve the problem in the coming weeks. This will give us time to draw up a new plan. "

But this was not done and it was [REDACTED] 10 lid 2 e who reacts and sends everything immediately and I logically will not refuse this help while you were spending precious time and keep going saying that the animals were my responsibility.

On the other hand [REDACTED] 10 lid 2 e offers to take the animals with most physical problems to proceed to treat them in her facilities. She covers all expenses and animals can return to Living Paleolithic when we have guarantees for their welfare. This could be in spring even if it is possibly earlier.

What concerns to the date of transfer of the animals, they were expected to move in the week from 7th to 15th September pending the administrative authorizations. Finally

it was made on the 7th despite be planned to be later and by mistake it was not corrected in the communication sent to you.

Since that day another session of this uncomfortable media circus had begun between ^{10 lid 2 e} and you with mutual attacks that make it clear that your differences come from time back and where we are again the perfect battlefield. I asked ^{10 lid 2 e} not to publish anything but she didn't answer my request, something that I didn't like at all.

For my part I cut relationship with the press and I dedicate myself just to observe. I have to see and go through the bad time of feeling threatened by Joke Bijl in press with paying 19,000 euros! If this would have transcended that news to the Spanish press, I assure you that it would now be a group of lawyers who would have this issue in their hands and with the intervention of the Dutch embassy in Spain directly on this matter. Remind Joke that direct or indirect threat and defamation is a crime in my country. He could have faced his misinformation. Her words were unfair to us and hurtful.

The contract with ^{10 lid 2 e} is a private contract between private initiatives that I am not going to make public or send to you. I have the firm impression that you treat me like a subordinate instead of a colleague who helped you with a serious overpopulation problem. Firstly you published that the animals are my responsibility and shortly thereafter you retract and ensure that this is your business. These types of contradictions are what make it very difficult to understand each other.

If animals are my responsibility you do not have to interfere at all and you must respect my criteria because I want the best for them. If on the other hand the responsibility is yours you must ensure that my animals have care and food for the next few years. Because what is not possible is that you decide what I should do with my money and my short resources. This is terrible. You manage millions of euros from the government, I survive with the tickets to the reserve and selling stuffed toys. And you still have the impertinence to tell me how to economically handle the situation, disrespecting our huge effort to keep us alive. And in addition you threat to ruin us financially with the fines of an abusive clauses contract that I made the mistake of signing.

As our spirit is always to build and help and not to destroy others I will give you the options we have to settle this problem forever.

Option A: Bring ^{10 lid 2 e} animals back when you decide as long as you provide transportation. You have to understand my resources are focused on the purchase of food for the present winter and I will not spend one euro to bring 20 more animals for feeding to Burgos. If finally the animals come here you would have to provide us with three hay trucks per year.

Option B: The animals stay where ^{10 lid 2 e} until my population of koniks has decreased by 25 thanks to the sale of the foals that are my property. I do not understand why you ask me to return them from southern Spain if you do not have any responsibility over the little ones (you said that to me). With the help of ^{10 lid 2 e} and ^{10 lid 2 e} we would look for funds to move them back. Once here I will transfer 10 adults, previous agreement with you, to the Bison Bonasus of Palencia reserve, a reserve very similar to ours just 100km from Living Paleolithic.

Option C: The horses are returned to Staatsbosbeher with all their foals.

We are willing to negotiate any solution as long as it does not involve any economic expense to Living Paleolithic and we could both succeed.

I would like to finish by clarifying some doubts. The first is why there are animals 2 or 3 years old with microchips of animals born much more years ago. We have detected horses of 2 years old that according to the microchip and passport were born in 2006, something impossible.

Secondly why we were not informed that practically all of the females were pregnant and that the population would double in a few weeks. And the third is why we were never warned of the consequences of bringing these animals here knowing that we would be placed inside the eye of the storm.

Finally, I agree that the only way of understanding is a fluently communication and the understanding of the situations in both parts. For this it is important that you treat us as an equal partner and not as your subordinates. Bringing those horses here was a favor that bring Living Paleolithic to SBB and I think you should have started from that premise when making any kind of declaration and decision.

I hope that with some time everything will calm down and we can return to the cordiality and the spirit of collaboration that has existed until last year. I think that we fight for the same purposes, the safeguard of the earth and the animals that we live on it.

Your sincerely

10 lid 2 e

15-12-19 22:30 - 10 lid 2 e: Hai 10 lid 2 e Thanks! That close would be great!

This week I hope to have our travelling schedule ready. Than I can tell you if we stay 1 or 2 nights.

16-12-19 14:24 - 10 lid 2 e: Hi! We are working on the trip to you. I will inform you in more detail this afternoon or tomorrow. We will probably be at your place in the evening around 8 o'clock and will leave Saturday. Hope we can already meet you/have dinner with you on Thursday 16th of January.

16-12-19 16:48 - 10 lid 2 e OK. No problem. We will dinner on 16th.

17-12-19 15:28 - 10 lid 2 e That sounds good!

17-12-19 15:28 - 10 lid 2 e I just emailed you about our visit. We are looking forward to next month to meet you!

17-12-19 16:47 - 10 lid 2 e OK thanks. I will check. See you soon!

09-01-20 14:58 - 10 lid 2 e: Hello 10 lid 2 e. I was trying to book the house I told you but in january they close so I book another different in Arlanzon Village. You have a private full house for you for 240€ total price for 2 days. We can dinner there bbq if you like on 16th or 17th as you like.

I hope you like the idea. If you have any suggestion tell me please.

09-01-20 20:32 - 10 lid 2 e Hi 10 lid 2 e That sounds good for us. For dinner you probably have better ideas than we could think of

09-01-20 20:36 - 10 lid 2 e Great. You arrive to Burgos at what time?

09-01-20 21:24 - 10 lid 2 e We will fly on Bilbao and will arrive there around 16.30.

09-01-20 21:35 - 10 lid 2 e: OK so like at 19h

09-01-20 21:36 - 10 lid 2 e: Do you both eat meat right?

10-01-20 11:19 - 10 lid 2 e: 10 lid 2 e prefers vegetarian. For me it doesn't matter.

10-01-20 11:23 - 10 lid 2 e: OK. Thanks

14-01-20 19:00 - 10 lid 2 e: Hi 10 lid 2 e We have some practical questions for our visit. Do you have an address where we have to navigate to? And can we have breakfast somewhere on Friday and Saturday morning or do we have to buy things on our way to Paleolithico Vivo? Do we need to bring towels and sheets?

Looking forward to meet you!!

14-01-20 19:03 - 10 lid 2 e: Hello! You have to arrive to Arlanzon Village. We will meet in the bar. Please text me when you are in Burgos and I will go to arlanzon. I will buy dinner for thursday eve and something for breakfast for two days for you. Towels and sheets are no necessary, you have in the rural hotel.

14-01-20 19:03 - 10 lid 2 e See you soon!

14-01-20 19:59 - 10 lid 2 e Okay! Thanks 10 lid 2 e, sounds good!

14-01-20 20:04 - 10 lid 2 e: They have also japanese bath outdoors. You can bring swim suit if you like to have a nice bath with very hot water in frozen weather. You can check the house in Internet.
